

POLYTECH

Product Catalogue for Aesthetic and Reconstructive Plastic Surgery

Nº 24
1 February 2019

Made in
Germany

POLYTECH Health & Aesthetics GmbH is one of the leading soft-tissue implant manufacturers. The company was founded in 1986 and since then, it has developed a broad range of products for plastic and reconstructive surgery.

The production sites and company headquarters are located in Dieburg, near Frankfurt, Germany. Extremely high quality and efficiency are achieved by concentrating research and development, manufacturing, sterilisation and quality control at one location.

POLYTECH Health & Aesthetics offers a broad range of implants for body contour correction. The standard program includes breast implants as well as pectoral, gluteal, testicular and calf implants plus a wide choice of expanders. Custom-made implants complement this ample portfolio.

Compression wear and products for scar treatment complete a product range specialised in Aesthetic and Reconstructive Plastic Surgery.

At **POLYTECH Health & Aesthetics**, we are focused on silicone-gel filled breast implants. Our standard products are Microthane® (micropolyurethane foam) covered implants and POLYtxt® implants. Medical studies have given evidence that implants with these surfaces show a reduced tendency to cause capsular contracture. The particularly high efficiency of the micropolyurethane surface has been documented in numerous medical studies and publications. Additionally, we offer POLYsmooth™ (smooth shell) implants and MESMO® sensitive (micro-textured shell) implants.

Since 1995, **POLYTECH Health & Aesthetics** has applied and certified a quality management system based on the ISO 13485 standard. Regarding raw material selection, product development, manufacturing, sterilisation, quality control, storage, sales and customer service, all specifications exacted from a certified company are met and continually verified. Products made by **POLYTECH Health & Aesthetics** have the CE mark and our breast implants are class-III certified medical devices approved by a Notified Body. This means, our products fulfill all standards required for medical devices in Europe.

POLYTECH Health & Aesthetics excels in providing first-rate service and high-quality products.

The POLYTECH Implant Surfaces

Microthane®

An implant-shell cover of medical-grade micropolyurethane foam. This surface is known for its reliability and has been proven to contribute to a sizable reduction of capsular contracture rates to 0–3%¹.

POLYtxt®

A textured implant-shell surface (50% reduced capsular contracture risk than with smooth implants)².

MESMO®sensitive

A micro-textured implant-shell surface.

POLYsmooth™

A smooth implant-shell surface.

On the following pages, the above colors for the respective surfaces are shown with the products so you will see immediately which product is available with the surface you are looking for.

1. (Handel, 1991 & 2006; Gasperoni, 1992; Pennisi, 1990; Shapiro, 1989; Baudelot, 1989; Artz, 1988; Hermann, 1984; Eyssen, 1984; Schatten, 1984; Hester et.al., 2001; Vázquez, 2007; Pompei, 2016 & 2017)

2. (Handel, 2006)

NOTE

Breast implants with a volume of 700 ml to 1100 ml are considered custom-made and therefore they are not included in our CE mark portfolio. They are manufactured on request after receipt of order. Implants with larger volumes are subject to special review. In close consultation with the surgeon, POLYTECH will decide on a case-by-case basis whether such an order can be accepted.

Breast implants POLYsmooth™

Même® SublimeLine® POLYsmooth™

Breast implants with smooth POLYsmooth™ surface, round base, central projection, filled with cohesive, form-stable silicone gel, delivered individually packed, sterile. € 0483

Breast implants MESMO®[®]sensitive

Breast implants with MESMO®[®]sensitive surface

The MESMO®[®]sensitive implant shell has a friction-minimized micro-textured surface. Its structure is more levelled than a standard texture, and that is why implants with this type of surface are easier to insert through a smaller incision.

SublimeLine[®]

maximum shape control

The POLYTECH *SublimeLine*[®]

Implant surface: MESMO® <i>sensitive</i>	Base style	Projection		
		moderate M	high H	extra-high X

Breast implants with POLYtxt® surface

The POLYtxt® surface is known for its reliability and has been proven to contribute to a reduction of capsular contracture rates. Textured-implant contracture rates are potentially 50% less than with smooth implants (Handel, 2006).

SublimeLine®

maximum shape control

The POLYTECH SublimeLine®

Implant surface: POLYtxt®	Base style	Projection

Breast implants POLYtxt®

Diagon\Gel®

The POLYTECH Diagon\Gel® 4Two series

Implant surface: POLYtxt®	Base style	Projection	
		high H	extra-high X
4Two AR round base, anatomical profile		 21631	 21632
4Two AO short base, anatomical profile		 21641	 21642

The POLYTECH Health & Aesthetics **Diagon\Gel®**

4Two implants are filled with two highly cross-linked, cohesive, form-stable clear gels: the softer EasyFit Gel™ at the posterior and the firmer Shapar Gel™ at the anterior.

The softer gel at the posterior of the implant ensures that the implant molds smoothly to the rib cage and provides for a natural movement of the breast. The firmer gel at the anterior and the dome-shaped projection facilitate nipple positioning and support the residual breast tissue in push-up style.

Breast implants with Microthane® cover

The most common complication of breast-implant surgery is capsular contracture. Implants covered in a medical-grade micropolyurethane foam suited for longterm implantation have been developed to minimize the event of capsular contracture as well as implant dislocation and rotation. The POLYTECH brand name for this type of implant shell surface is Microthane®.

In extensive clinical studies reviewing large numbers of patients, the

capsular contracture rates (Baker classification III–IV) have been determined. For polyurethane-foam-covered implants placed in virgin tissue, the capsular contracture rate is 0–9% compared to 9–50% for other implants; in most of the big studies, the capsular contracture rate for polyurethane-foam-covered implants is as low as 0–3%.¹ Moreover, POLYTECH Microthane® implants are the safe choice for both, primary breast augmentation and 2-stage breast reconstruction, even in case of radiation treatment.²

Breast implants Microthane®

Diagon\Gel®

The POLYTECH Diagon\Gel® 4Two series

Implant surface: Microthane®	Base style	Projection	
		high H	extra-high X
4Two AR round base, anatomical profile		 31631	 31632
4Two AO short base, anatomical profile		 31641	 31642

The POLYTECH Health & Aesthetics Diagon\Gel®

4Two implants are filled with two highly cross-linked, cohesive, form-stable clear gels: the softer EasyFit Gel™ at the posterior and the firmer Shapar Gel™ at the anterior.

The softer gel at the posterior of the implant ensures that the implant molds smoothly to the rib cage and provides for a natural movement of the breast. The firmer gel at the anterior and the dome-shaped projection facilitate nipple positioning and support the residual breast tissue in push-up style.

Breast implants Microthane®

Diagon\Gel® 4Two AR Microthane®

Breast implants with Microthane® (micro-polyurethane foam) surface, round base, anatomical projection, filled with 2 cohesive, form-stable silicone gels, delivered individually packed, sterile. C€ 0483

- ▶ Tissue expanders

Breast Expanders

IMPORTANT INFORMATION:

All expanders with remote valve are delivered incl. a large valve (compartment diameter ca. 17mm, outer diameter ca. 34mm). A small valve (compartment diameter ca. 11mm, outer diameter ca. 22mm) may be ordered separately (order n° 72005, see below).

All expanders with integrated valve are delivered with a magnet finder. Additional magnet finders can be ordered separately (order n° 20738-012, see below).

All integrated valves are equipped with a permanent magnet.

WARNING: expanders with integrated magnets are not eligible for patients having pace-makers or patients who need an MRI examination during the implantation period.

Valve Ø 11 mm for expanders with remote valve

Compartment diameter 11mm, outer diameter 22mm,
incl. tube connector; individually packed, sterile

Custom-made implants

Custom-made implants

If you need implants or expanders with individual specifications, we will manufacture these custom-made on demand.

Please consider the following issues when planning a custom-made implant.

What we need from you:

- a moulage or the exact dimensions, shape and weight of the required product
- specification of the product surface (covered in Microthane®, POLYtxt®, MESMO®sensitive micro-texture, POLYsmooth™)
- specification of the filler material (cohesive silicone gel or highly polymerised silicone)
- specification of the consistency / firmness of the filling
- concerning expanders: specification of the required valve type and size (integrated magnetic valve or remote valve, Ø 11 or 17mm)

What you get from us:

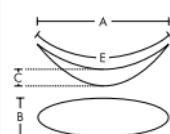

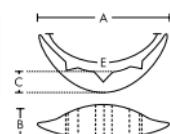

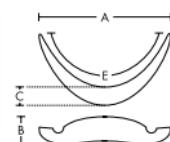

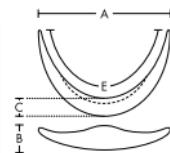

- qualified assistance during the development of your custom-made implant or expander
- order forms listing in detail the optional product specifications
- on demand: samples of existing implants for you to choose the desired consistency and rigidity
- free moulage kits
- supply after order 8 to 10 weeks
- pricing calculated on a time and material basis
- product quality in accordance with the Medical Device Directive

In advance, you will get an order confirmation giving you the exact price and the scheduled delivery date of your custom-made implant.
